Alan Koibagarov

Senior Frontend Developer | Vue.js | Nuxt | JavaScript & TypeScript |
6+ years of experience

Almaty, Kazakhstan

Experience

Freelancer- Self employed

Freelance Web Developer

January 2026 - Present (5 months)

Andersen Lab

3 years 9 months

Senior Frontend Developer

February 2024 - July 2025 (1 year 6 months)

Remote

Development of a web application that provides a calculator for the fire
resistance

of painted surfaces.

- Developed a 3D building visualizer to provide users functionality to see construction and the details of its parts without using any additional software.
- Created a Dashboard to compare 2 to 5 different project options by materials and cost and select the best one.
- Migrated project from Vue 2.6 to Vue 3.4
- Implemented unit tests and raised coverage from 0 to 60% (80% on core components)

Frontend Developer

November 2021 - February 2024 (2 years 4 months)

Remote

Worked on 2 projects:

1) The Customer provides telecommunications services (primarily mobile services) in

the CIS countries. The project involved developing an admin panel from scratch that allows

to control client accounts, check the balance and current tariffs, connect or disconnect

services, replenish the balance, make P2P transfers, etc.

What was done:

- Initialized the project, installed base packages, routing, core UI library (Element Plus), linters, Webpack and folder, code structure
- Worked on creation of base app layout and customization
- Implemented authentication, authorization based on user roles
- Created CRUD tables and dashboards to manage company clients.

2) A marketplace designed for the selection of medical professionals to fill open vacancies or temporary shifts in clinics, pharmacies, and hospitals. The platform targets qualified candidates with confirmed work experience, certifications, and other relevant credentials. Both employers and applicants can register on the platform to connect and find suitable matches. The product is tailored for sale in the UK, South Africa, Australia, and the USA.

What was done:

- Participated in creation of a custom UI library, using Tailwind as a style library and a Storybook to view all components.
- Created base application layout with adaptivity for desktop, tablets, mobile dimensions
- Implemented permission-based authorization for users.
- Created CRUD's for admins, clients, job seekers.
- Created a dashboard for admins and clients, using components and ApexCharts
- Added application themes (light, dark, custom colors by using palette).

Bilim Media Group
Frontend Developer
March 2021 - August 2021 (6 months)

Казахстан

Participated in development of a marketplace designed to assist parents in searching for educational institutions such as schools, colleges, and kindergartens. The platform offers comprehensive features including search functionality, reviews, maps, and detailed information about each organization.

KT Cloud Lab

Frontend Developer

February 2019 - March 2021 (2 years 2 months)

Kazakhstan

Developed SPA application utilized by call centers to conduct mass surveys.

The primary

clients are government entities and large corporations interested in gathering insights

on policy matters, military affairs, vaccination initiatives, product opinions, and more

Also took part in development of an administration panel designed for the registration and maintenance of an organization's database. Additionally, it serves as a web catalog for organization-related information.

Фриланс

Внештатный веб-разработчик

May 2018 - December 2018 (8 months)
